Summary

Full Stack Software Engineer with experience building production-grade web applications and AI-powered systems. Specialized in React, Node.js, and Express.js, with hands-on experience integrating LLM APIs, designing scalable backends, and deploying cloud-native solutions.

Education

- **Bachelor of Software Engineering (BSSE)**, University of Karachi Dec 2021 – Present
- **General Science**, Govt Degree Science and Commerce College 2019 – 2021

Technical Skills

- **Frontend:** React, Next.js, JavaScript, Tailwind
- **Backend:** Node.js, Express.js, Hono.js
- **Databases:** MongoDB, MySQL, MSSQL, SQL
- **Cloud:** AWS S3, Vercel, Railway
- **ML/AI:** Whisper API, LLM Pipelines, Random Forest
- **Tools:** Git, REST APIs, Postman

Professional Experience

- **Full Stack Developer** — Mobius Inc. May 2024 – Nov 2024
Developed and optimized production web applications handling 1,000+ monthly requests, improved API performance, and collaborated with cross-functional teams to ship features in agile sprints.
- **Frontend Developer Intern** — MaxERP Jan 2024 – Feb 2024
Built and maintained responsive React and Next.js interfaces, reducing UI bugs and improving usability through close collaboration with designers and backend engineers.

Freelance Projects

- **AI Sales CRM Platform** — Built a full-stack analytics system with Twilio + Whisper AI pipeline, enabling real-time call insights and improving agent efficiency.
- **E-commerce Backend Migration** — Rebuilt a Node.js + MSSQL backend for 5000+ products with Redis caching, reducing API response times by over 60%.
- **Headless CMS Platform** — Developed a Hono.js backend and React admin dashboard, migrating 500+ articles from WordPress to MongoDB with zero data loss.
- **Restaurant Ordering Platform** — Delivered a MERN-based ordering system with real-time notifications, increasing the client's online sales by 40%.

Projects

- **TechPath AI (Final Year Project)** — Full-stack AI-driven career recommendation system integrating Gemini API, Bloom's Taxonomy-based assessments, modules, and gamified learning content, and AWS services.
- **Agile Development Tool** — Kanban/Scrum platform built with Next.js and Node.js featuring real-time collaboration via Socket.io.
- **Sign Language Recognition System** — Trained a Random Forest model on a custom dataset for gesture classification; research presented at an IEEE conference.

Certifications & Activities

- **University Career Fair Host** (Dec 2024) — Organized event with 200+ attendees and industry professionals.
- **Udemy: The Complete ReactJS Course** (Feb 2023)
- **FreeCodeCamp: Responsive Web Design** (Sep 2022)
